

# At XSYS, we make your thin-walled sleeves last longer!

Our rotec® product development team is constantly developing innovations to evolve our sleeves to meet the needs of our customer.

Historical development of thin-walled **rotec® Blue Light Sleeves** and their ever-improving advantages:

1993

**Original Sleeves**  
(0.9 - 125mm)

2016

**Strengthened Notches**  
(0.9 - 2mm)

2020

**Long-lasting Construction**  
(0.7 - 1.7mm)

Optimal surface, especially for  
scratch- and solvent-resistance

Excellent Print Quality

Good mounting

No problem to apply  
or remove tape

+  
Strengthened notches

+  
**Improved overall  
stability compared**  
to original Blue Light Sleeves:

**Less likely to crack**

**More cut-resistant**

**Longer lasting**

**Smoother surface**  
compared to competitive  
products

**Be**  
brilliant.

**XSYS**

Print solid. Stay flexible.
